RE: Waste Collection

Millennium Waste Incorporated is your new waste collection service provider. We are grateful for the opportunity to serve the residents of Monmouth. We begin June 1, 2017. Your collection day will remain the same as in the past.

Services

We will be providing a clean, automated service. Each resident will receive a cart for weekly waste collection. The cart will be 95 gallons, unless a smaller cart is requested. **If you would like a cart smaller than 95 gallons, please call us by May 24th at (309) 787-2303 or City Hall 734-2141.**

Enclosed is a brochure regarding proper placement of the cart for collection vehicle accessibility.

Cart Delivery

We have ordered the carts and they will be delivered in the next few weeks. We will deliver 95 gallon carts, unless you specifically request a smaller cart (see above). The garbage and recycling carts belong at the address they were delivered and are the property of MWI. **Again, please call by May 24th if you would like a cart smaller than 95 gallons.**

Extra Bags

If your waste does not all fit in your cart, additional bags will be collected if an MWI sticker is attached. Each bag will require a sticker. The stickers will cost \$2.00 each and may be purchased at City Hall or the City Transfer Station. **The extra bag stickers may be used for items with the following maximum size limits: four feet in length, 33 gallons in volume, and 30 pounds in weight.**

Bulky Waste

Bulky Waste items should be taken to the City Transfer Station for disposal. Bulky Waste items are those items utilized in a normal household setting that is other than normal household trash. These items are generally too large either by weight or volume to fit in a normal trash container. Examples of Bulky Waste items are couches, hide-a-beds, chairs, tables, mattress and springs, beds, waterbed frames, and small boxed do-it-yourself remodeling projects.

Spring Cleanup

Clean-up week will be June 5-9. Place your waste on the curb the day prior to your normal garbage collection day.

Important points for clean-up week:

- Place waste on the boulevard, near the street.
- Future City-wide Cleanups allow collection of no more than the volume of one pick-up truck load from each residence.
- Items NOT acceptable include: electronics, tires, batteries, liquids (oils, gas, wet paints, chemicals), yard waste concrete and auto parts.
- Paint and electronics are accepted at the Transfer Station at NO charge. Do not put them on the curb.
